

EZ-REC RACK<sup>HD</sup>

We pick up your toys

Life's tough enough. Getting your gear down the road shouldn't be.

## 5 THINGS YOU NEED TO KNOW ABOUT OUR RACK

### 1. INDEPENDENCE

Living the Outdoors lifestyle is all about being able to survive on your own. Having a perfect tool for the job makes the experience more enjoyable.

### 2. RELIABILITY

Using powder-coated high grade aluminum in our design makes it weatherproof, allowing our rack to be light enough to lift, but still sturdy and able to carry loads up to 140 lbs.

### 3. DEPENDABILITY

One-person operation and ability to secure your load on the ground makes this rack a perfect solo expedition companion.

### 4. LEADERSHIP

Setting an example as the first rear-loading design on the market, with less moving parts and a multitude of attachment positions our rack can handle most of what you can throw at it. Having the right gear does make a difference.

### 5. ADVANTAGE

Being ahead of the crowd puts you in the optimal position. With the correct position of the load on our rack the lifted weight can be reduced up to 50%. Work smart, not hard.

If you're already a part of the EZ Rack Family - We thank You!
